

**The Microsoft Configuration Manager 2007/2012
IT Asset Management Bible
"Professional Experience Distilled"**

**Over 100 chapters with complete guidance in how to set-up and configure
IT Asset Management capabilities in Microsoft ConfigMgr 2007/2012**

"Using this book, we were able to move from a bare bones implementation of ConfigMgr to full use of its
IT Asset Management capabilities and features." – IT Director, Fortune 1000 Company

- With easy-to-follow instructions and screen shots
- With custom queries and scripts that are ready to use for IT Asset Management
- Step-by-step directions in how to configure ConfigMgr for license reconciliation purposes
- Contains 'best of ' contents from ConfigMgr blogs
- Includes extensive set-up and troubleshooting sections
- Supplements TechNet articles (which provide entry level detail)
- Where applicable, coverage of SMS 2003 topics
- Bonus Sections Include: MS-SQL Server Configuration Best Practices / Review of Add-On Tools for ConfigMgr IT Asset Management / How to Configure ConfigMgr Custom Reports using SQL Server Reporting Services (SSRS) , and Other Topics

For more information on how to procure a copy of this book, email info@aid.com

TABLE of CONTENTS (below)

| B – BACKGROUND INFO | Q – MS-SQL QUERIES | O – OTHER STEPS AND INFO (continued) |
|--|---|---|
| <ol style="list-style-type: none"> 1. An Explanation of the Asset Intelligence Views in the ConfigMgr Database (B1) 2. Description of AI Classes and Standard Reports that are Dependent on Them Being Enabled (B2) 3. A Primer on IT Asset Mgt ConfigMgr Database Tables and How They Map to the Data Collection (B3) 4. Limitations on ConfigMgr Asset Intelligence and Reporting (B4) 5. About Asset Intelligence Validation States (B5) | <ol style="list-style-type: none"> 1. Q1 Query One -- Produces a Software List by Machine (Q1) 2. Q2 Query Two -- Processor Counts, Primary User, and Virtual Machine Identification -- MOF changes required (Q2) 3. Q3 Query Three -- How to Identify the Primary User by Machine -- MOF changes required (Q3) 4. Q4 Query Four -- Relations Between Virtual Guests to Physical Host Machines -- MOF changes required (Q4) | <ol style="list-style-type: none"> 39. O29 -- How to Pull Group Policy History via ConfigMgr 40. O30 -- More on Self Service Provisioning and Shopping Carts in ConfigMgr 41. O27 -- Total ARP entries Plus Avg Executables per Machine Queries 42. O28 -- How to Use ConfigMgr for Desired Configuration Management DCM 43. O29 -- Details on how to Automate the Creation of Collections |

6. How ConfigMgr Gathers SW Inventories using HINV and SINV (B6)
7. Info on the ConfigMgr Agent Footprint (B7)
8. An explanation of SMS_DEF.MOF versus CONFIGURATION.MOF (B8)
9. A Primer on SQL Server Reporting Services -- SRS (B9)
10. Comparing ConfigMgr 2007 and System Center Essentials SCE 2010 (B10)
11. Primary versus Secondary Sites -- An Explanation (B11)

S – STEP BY STEP GUIDE IN HOW TO DEPLOY CONFIGMGR TO GET VALID AND RELIABLE DATA FOR A LICENSE RECONCILIATION REPORT

6. S1 -- Step One -- DNS Scavenging, How to Ensure Proper Inclusions of Machines in Future Reconciliation Efforts (S1)
7. S2 -- Step Two -- How to Discover New Devices Using ConfigMgr -- An Overview of AD, Network, Heartbeat and Other System Discovery Methods (S2)
8. S3 -- Step Three -- Option_1 -- How to Identify and Clean Up Obsolete and Inactive Machines (S3_1)
9. S3 -- Step Three -- Option_2 -- Check Machine Passwords Not Reset in X Days -- Cleans Up Retired and Past Inclusion of Improper MACHINES (S3_2)
10. S3 -- Step Three -- Option_3 -- How to Clean Up Inactive USERS (S3_3)
11. S4 -- Step Four -- Part 1 -- How to Ensure all Windows Machines have ConfigMgr Clients and Instructions

44. Q5 Query Five -- Checking System Health -- e.g. HW SW Inv etc (Q5)
45. Q6 Query Six -- Confirm Version and Edition of MS-SQL Server by Machine -- MOF Changes Required (Q6)

O – OTHER STEPS AND INFO IN HOW TO CONFIGURE AND USE CONFIGMGR FOR IT ASSET MGT.

1. O1 -- How to BackUp and Restore a SMS SCCM Database and SRS
2. O2 A -- How to Collect Certain Files from Remote Clients -- SMS SP3 or SCCM
3. O2 B -- How to Collect Certain Registry or WMI Info from Remote Clients -- Extending the MOF -- SMS SP3 or SCCM
4. O2 B -- More WMI Info for Triggering Menu Options in ConfigMgr
5. O2 C -- How to Collect Environment Variables from Remote Clients
6. O2 D -- How to Identify Specific Services Running, Files Residing and Other Info on Remote Machines
7. O2 E -- How to Collect Event Viewer Info
8. O2 F -- How to Inventory the Client Cache using SMSConfigMgr Hardware Inventory
9. O2 G -- How to Gather MSI Installation and Other Add Remove Program Registry Info from Clients
10. O3 -- How to Search for Particular Executable Files (that have been gathered from remote clients)
11. O4 -- How to Exclude Certain File Folders from SW Inventory Process
12. O5 -- How to Collect and View Files Collected from Clients

44. O29 -- How to Pull Group Policy History via ConfigMgr
45. O30 -- More on Self Service Provisioning and Shopping Carts in ConfigMgr
46. O31 -- How to Identify Terminal and Citrix Servers and Embedded OS Devices
47. O32 -- How to Gather and Input Lease Info in ConfigMgr - Hardware Inventory
48. O33 -- How to Concatenate MAC addresses and IP Addresses into their Own Columns
49. O34 -- How to Retrieve Computer Monitor Serial Numbers for SMS 2003
50. O35 -- Sizing (Database storage) and Network Bandwidth Required when Asset Intelligence is Enabled
51. O36 -- How to Gather Physical Memory Inventories and Reporting
52. O37 -- How to Monitor Hardware Changes in ConfigMgr
53. O38 -- How to Perform a Software Inventory that Detects Uninstalled Software
54. O39 -- How To Configure and Apply Software Restriction Policies

W – WEB REPORTS FOR CONFIGMRG 2007

1. W1 -- How to Change the Maximum Rows Returned in the Values List that is Defaulted to 1000 rows (W1)
2. W2 -- PreReqs for Add Remove Program Reports -

| | | |
|---|---|---|
| <p>on How to Deploy Them Where Missing (S4_1)</p> <p>12. S4 -- Step Four -- Part 2 -- How to Manually Remove a ConfigMgr Client (S4_2)</p> <p>13. S5 -- Step Five -- How to Install SCCM Clients using Group Policies (S5)</p> <p>14. S6 -- Step Six -- How to Fix and Ensure No Duplicate Machine GUIDs (S6)</p> <p><i>Skip to Step Ten</i></p> <p>15. S10 -- Step Ten -- Part 1 -- Enabling Asset Intelligence -- How To -- SMS SP3 or SCCM -- MOF changes required (S10_1)</p> <p>16. S10 -- Step Ten -- Part 2 -- Enabling Asset Intelligence -- Monitoring and Logging and Troubleshooting -- SMS SP3 or SCCM (S10_2)</p> <p>17. S11 -- Step Eleven -- Part 1 -- Enable Asset Intelligence Synchronization Point and Catalog Updates -- SMS SP3 and SCCM 2007 (S11_1)</p> <p>18. S11 -- Step Eleven -- Part 2 -- Hotfix Rollups for Asset Intelligence in SCCM 2007 SP2 (NOT SP1) (S11_2)</p> <p>19. S11 -- Step Eleven -- Part 3 -- How to Keep Collection Data Up to Date (S11_3)</p> <p>20. S11 -- Step Eleven -- Part 4 -- Other ConfigMgr Hotfixes to Consider Installing (S11_4)</p> <p>21. S12 -- Step Twelve -- How to Enable and Use SW Usage Monitoring (S12)</p> <p>22. S13 -- Step Thirteen -- How to Enable Windows and Exchange Standard CAL Tracking (S13)</p> <p>23. S14 -- Step Fourteen -- How to Enable and Make Use of ConfigMgrs Native License Reporting (S14)</p> <p>24. S15 -- Step Fifteen -- Handling Unidentified and Uncategorized apps -- More on Categories, Families, Labels, Tags etc. (S15)</p> | <p>13. O6 -- Enabling WMI PreReqs</p> <p>14. O7 -- How to Determine Which Version of SMS or SCCM is Deployed</p> <p>15. O8 A -- Info on Add-On Tools and Plug-Ins for ConfigMgr</p> <p>16. O8 B -- Info with Screen Shots of SCCM Expert Add-On Tool for SCCM</p> <p>17. O8 C -- HP, Dell and IBM Asset Mgt Tools that Integrate with SCCM for Collection of HW Warranty Info etc</p> <p>18. O9 -- How to Identify Applications Uninstalled in last X Days</p> <p>19. O10 -- General Best Practices for Configuring and Maintaining MS-SQL Server -- e.g. DB Backup, etc.</p> <p>20. O11 -- How to Compare Add/Remove Program Entries on Two Computers</p> <p>21. O12 -- How to Configure Asset Intelligence User Access and User Security for Asset Managers</p> <p>22. O13-- How to Extend HW Inventory for PNP Devices</p> <p>23. O14 -- How to Identify Decommissioned Client Records at the Primary Site for Configuration Manager Clients</p> <p>24. O15 -- How to Compare Software Installed on Two Systems</p> <p>25. O16 -- How to Identify All MAC and IP Addresses per Machine</p> <p>26. O17 -- How to Identify Missing Hardware Inventory Across Computer Collections in ConfigMgr</p> <p>27. O18 -- A Primer on How to Inventory and Track Microsoft App-V Applications -- Application Virtualization</p> <p>28. O19 -- How to Optimally Configure SQL2008 and SQL2008R2 for ConfigMgr</p> <p>29. O20 -- How to Identify SCCM Client Versions by MachineName or SiteCode</p> <p>30. O21 -- How to Configure and Use a</p> | <p>- Query Builder Values Box Cannot Display Large Item List (W2)</p> <p>3. W3 -- Desktop Readiness Report within SCCM (W3)</p> <p>4. W4 -- Creating SMS Web Reports from SMS Queries (W4)</p> <div style="background-color: #cccccc; padding: 5px; text-align: center; font-weight: bold;">T- TROUBLESHOOTING STEPS</div> <p>1. T1 A -- How to Repair WMI Problems</p> <p>2. T1 B -- How to Test WMI Connectivity</p> <p>3. T1 C -- Other WMI Troubleshooting Steps</p> <p>4. T2 -- Troubleshooting Issues When ConfigMgr Clients are Not Reporting</p> <p>5. T3 -- Troubleshooting Client Push, HW Inv, SW Updates, SW Inv, Heartbeat Discovery, and SW Distribution</p> <p>6. T4 A1 -- Monitoring Client Health in SCCM 2007 with CSR - Client Status Reporting - - ConfigMgr 2007 R2+</p> <p>7. T4 A2 -- Monitoring Client Health in SCCM 2012</p> <p>8. T4 A3 -- ConfigMgr 2007 Client Health Check Tool</p> <p>9. T4 A4 -- Another ConfigMgr 2007 Client Health Check Tool as Startup Script</p> <p>10. T4 A5 -- Client Health Other Options and Tools</p> <p>11. T4 A6 -- SMS 2003 and SCCM 2007 SP Status Message Descriptions and Documentation</p> <p>12. T5 -- How to Determine Which Machines Have ConfigMgr Agents</p> |
